turning demonstrations.
"Over and above the 10
orders taken, our sales and
applications team have a host
of quotations and follow-up
visits to make over the next few
weeks," Mr Bryant added. "This
will no doubt add to our order

particular to significantly reduce
leadtimes through more efficient
single cycle production."

Engineers from the OEM
sector were also looking for
solutions to increase productivity
and lower production costs and
several had new projects to tool-

requirements of our customers
in every way that we can'.

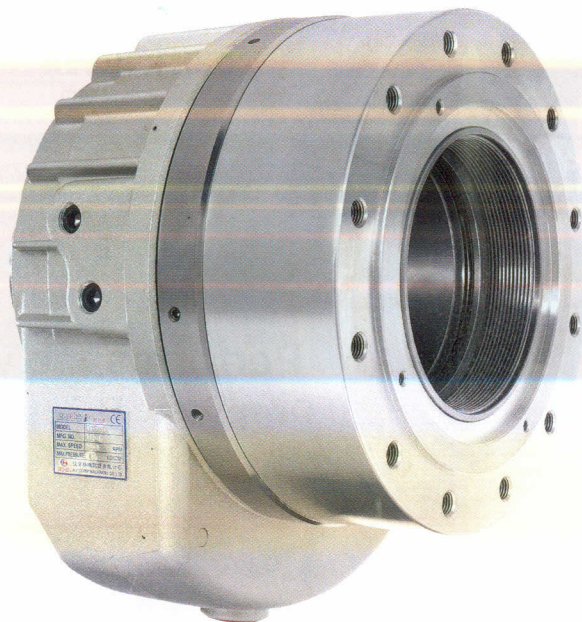

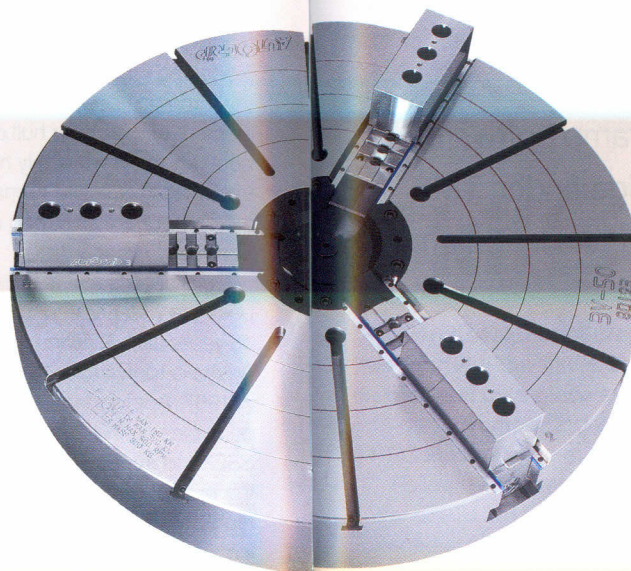

Leader takes on Autogrip

**Workholding specialist,
Leader Chuck Systems has
recently signed a contract
with Taiwanese workholding
manufacturer, Autogrip
Machinery.**

Under the new agreement
the Tamworth-based company
will assume full responsibility
for sales of Autogrip's
extensive range high precision
power chucks and rotary
cylinders in the UK, which
includes pre-sales technical
support, stocks of popular

items and spare parts being
held by Leader at its logistics
facility in Leamington Spa.

For bar feed or billet loading
precision turning applications
Autogrip has a range of through
bore and closed centre standard
and long stroke two, three
and four jaw power chucks,
designed to operate at up to
8,000rpm. For drilling, milling,
grinding and other machining
operations, a range of three
jaw stationary power chucks
is available. All chucks are

produced from hardened and
ground steel and feature direct
lubrication. Autogrip hydraulic
rotary cylinders are constructed
from lightweight materials with
through bore and closed centre
workholding solutions offering a
range of options.

Leader Chuck's managing
director, Mark Jones,
commented: "Autogrip has
an established reputation
for producing high quality
workholding products,
manufacturing power chucks
and hydraulic rotary cylinders for
a number of world class OEM
machine tool builders. With our

new contract in place, Leader
can now offer the complete
cost-effective workholding
range from Autogrip."

Based in Changhua County,
Taiwan, Autogrip Machinery
has been producing precision
chucks for over two decades.
Today, the ISO9001 accredited
company employs around 600
people.
